

# Offering in-home therapy, school consultation, and presentation/training services

Going beyond therapy...  
helping everyone grow in  
stride

We don't simply provide therapy to the clients we serve. We strive to support the whole team by providing ongoing education and training to family members. We also seek opportunities in the community to train people across all settings so that they are better equipped to foster growth in those with various needs.

We design a specific plan guided by thorough assessments and previous research to help clients and their families move from where they are toward fulfilling their ultimate goals.

Our top priority is  
everyone's  
success without us

By providing thorough training and sound programming, we are able to teach families and others to use the strategies in new ways, continuing the teaching process even after therapy has "ended." At the end of the day, we strive to teach others how to continue fostering growth without our help.

Services specifically  
tailored to meet you where  
you are

We understand the importance of giving every client and family the attention they need to flourish. Rather than focus on growing a company, we focus on providing superior-quality therapy to every client.

We stay small so our  
clients grow big

The mission of Footsteps of Change, Inc. is to provide effective therapy to individuals in need through evidence-based interventions, across all settings, provided by compassionate and highly-trained staff, thereby restoring hope for the individuals we serve and their families that growth and change are always possible, regardless of the circumstances.
